Enhancing React Component Performance and State Management #461

EditNew issue

Web searchCopy

Open

SSP25SCM66P opened 9 minutes ago

Description

This issue focuses on optimizing the performance and state management of React components within the application. The goal is to reduce re-renders, manage state efficiently, and ensure smooth user interactions.

Tasks

- Refactor state management using Context API or Redux.
- Implement memoization techniques to prevent unnecessary re-renders.
- Optimize component rendering logic to enhance performance.
- Improve API request handling and caching for efficient data fetching.

Expected Outcome

- Improved application performance with minimal re-renders.
- Efficient state management and data handling.
- Enhanced user experience with smoother interactions.
